Indiana University Melvin and Bren Simon Cancer Center Support Grant

Principal Investigator: Patrick Loehrer, MD (IU)

Research Team: Victoria Champion, PhD, RN, FAAN (IU), Michael Darling, MHA (IU), Sherif Farag, MBBS, PhD (IU), Mark Kelley, PhD (IU), Harikrishna Nakashatri, BVSc, DVM, PhD (IU), Douglas Schwartzentruber, MD, FACS (IU)

Dates of Support: 09/01/2014 – 08/31/2019  Total Award Amount: $1,559,793

Funding Agency: National Cancer Institute (2P30CA082709-15)

Abstract:

At the IU Simon Cancer Center, more than 200 scientists conduct research in the areas of breast cancer; cancer prevention and control; experimental and developmental therapeutics; hematology, malignant hematology, and immunology; and tumor microenvironment and metastasis. Each year, our physician-researchers lead more than 600 active clinical trials for pediatric and adult cancers.

Our researchers have made protocol-defining discoveries that have changed the way doctors treat testicular cancer, breast cancer, gastrointestinal cancer, genitourinary cancer, leukemia, multiple myeloma, thymoma and thymic carcinomas, and thoracic cancer.

The researchers at the IU Simon Cancer Center are primarily faculty of the IU School of Medicine. They also include researchers from the IU School of Nursing, Purdue University and the University of Notre Dame.
